Cast Glass

A distinctive specialty of Verre select, refreshingly unique architectural look of our CAS T GLASS COLLECTION is sure to make an impression. This product, made by a high temperature treatment of glass, gets more popular every year, thanks to its unique and attractive look. Our CAS T GLASS COLLECTION is the outcome of 12 years of development, in a process that creates a unique piece with its own character and charm every time we produce it. A very safe material, cast glass is made from a 3/4 inch thick pane of glass that is molded and then secured by tempering. The resulting panel is then built into a double sealed unit, tempered on both sides, for maximum durability. An enlightened choice.

executive panel series

When we introduced these panels to the market 10 years ago, the EXECUTIVE PANEL series sent a shockwave in the steel door industry, and they have become more popular every year since. These "high definition" panels, inspired by the moldings used on traditional wooden doors, can be used with decorative glass panels, in any number of combinations.

ONT-ExE108-AL

*High-definition decorative panel
"make sure you buy the original."
Don't settle for inferior imitations.*
