FIBERGLASS DOORS

FIBERGLASS
DOORS

Fiberglass doors and composite mouldings combine modern technology with functionality and style. Water resistant technology and composite door frame components make them built for the Canadian climate.

Factory Direct supplies and installs these doors in Montreal, Laval and the South Shore. Visit our showroom at 1190 rue Bégin in Saint-Laurent, or call (514) 387-0001 for a free in-home estimate.

BUILT FOR THE

CANADIAN CLIMATE

Unsurpassed vertical integration and ISO 9001 / ISO 14000 monitored manufacturing processes help support the R&D team.

- **High impact compression moulded fiberglass skins** are "weatherproof" and will not delaminate, corrode, mold or mildew. These fiberglass doors also do not dent, rust, warp, crack, split, splinter, or rot and are very easy to keep clean.
- **Waterproof composite stiles and rails** are sealed and beautifully finished to protect all edges of the door from moisture penetration which could harm the inner insulation. The composite material will not delaminate or splinter and boasts twice the screw-holding capacity of typical wood-edge doors. The top and bottom rails are also composite components that prevent water seepage, are easy to trim and pre-machined to accommodate the bottom weather sweep. This patented innovation protects every fiberglass door from moisture infiltration.
- **Full length lock block** and more internal structure than any door of its kind in North America. This structural reinforcement also ensures added security against forced entry and provides incomparable stability.
- **Guaranteed.** Every door carries a 25 year limited manufacturer's warranty. Not only do they stand behind any manufacturing defects, they also warrant against 'thermal bow'.

NEULITE BRUSH BLACK ONE-LITE

TEXTURED FIBERGLASS

Direct glazed with insulated 1" glass to streamline installation and minimize the risk of seal failure. The shaker-style glass stops offer a sophisticated, modern, and refined look.

The pre-pigmented brush texture skin in trendy black colour reduces the time and labor required for door finishing and demands minimal maintenance over time.

This collection is available in two standard heights and a variety of widths. Matching sidelites and optional SDL are also available to meet your requirements.

BK10(79") / BK11(95")
29 ¾, 31 ¾, 33 ¾, 35 ¾ X 79, 95

** For glass options (Low-E, Translucent & Mini-Blinds), please consult the program offering.*

NEULITE BRUSH BLACK 3/4-LITE

TEXTURED FIBERGLASS

The 3/4-lite collection maintains the same features and benefits as the direct glazed 1" glass and black pre-pigmented brushed texture skin found in its One-lite counterpart. The bottom recessed panel exhibits a deep profile that creates a prominent shadow line, contributing to an ultra-modern aesthetic.

Optional SDL can be added to the panel to achieve a tailored appealing that meets your specifications.

BK27(79") / BK28(95")
29 ¾, 31 ¾, 33 ¾, 35 ¾ X 79, 95

** For glass options (Low-E, Translucent & Mini-Blinds), please consult the program offering.*

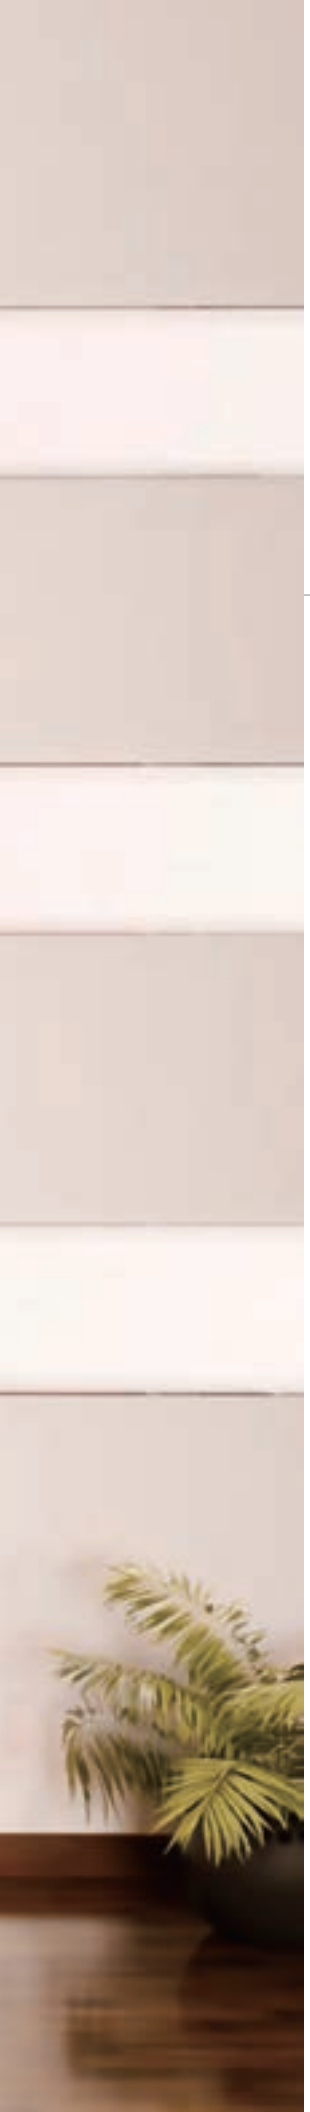
NEULITE BRUSH WHITE 1/4-LITE

TEXTURED FIBERGLASS

Every home deserves a distinctive look. The Craftsman style blends rustic charm with clean, straight lines and minimal decoration, making it the ideal door for homes featuring natural stonework, wood beams, or columns. The direct glazed 1" glass allows the perfect amount of natural light to enter the home. The option of translucent glass provides the desired privacy. The brush-textured door skin comes in white, which can readily be finished in a stain or paint color that matches your taste. Optional SDLs are available to create the appearance of divided lites.

BW3N
31 ¾, 33 ¾, 35 ¾ X 79, 83

** For glass options, please consult the program offering and the corresponding price list.*



MODERN TEAK

TEXTURED FIBERGLASS

Long praised for its natural beauty and endurance to the elements, teak has become one of the most valued wood species on the planet. This modern fiberglass teak design is perfect for contemporary or traditional design.

Though the teak series is beautiful with any hardware combination, European styling is achieved when paired with an architectural door pull and deadbolt combination.

When ordered, these slabs arrive as a light almond colour to accept paint or gel stain.

TG71
31 ¾, 33 ¾, 35 ¾ X 79, 84

TEAK FLUSH

TEXTURED FIBERGLASS

As a continuation of our popular Teak design, the **Teak Flush** fiberglass door adds a contemporary but classic touch to any entranceway.

Achieve a fresh and distinctive look by adding a few simple grooved lines or stainless-steel decorative elements.

TG07 / TG00(79") & TG01(95")

NEW SHAKER MODELS

3 LITES SOLID

Sharp and sleek contemporary design complements today's home decor trends.

High definition embossed panels provide deep and vivid shadow lines. The rich, elegant Fir grain pattern makes painting and staining a breeze.

FG3J / FG30 FIR GRAIN
31 ¾, 33 ¾, 35 ¾ X 79

SG3J / SG30 SMOOTH WHITE
31 ¾, 33 ¾, 35 ¾ X 79

OPEN & BEADED

TRADITIONAL OAK & SMOOTH WHITE

Open & beaded fiberglass slabs feature sleek lines, providing the perception of a more enhanced viewing area. Smooth white or oak woodgrain slabs are consistent from door edge to glass, incorporating the glass directly into the door and creating a clean, uninterrupted look.

The slab is manufactured as an open and beaded mould with removable glass stops and an opening to accept a glass insert that can be interchanged in an event of glass failure or a change of home owner's taste. The flush glazing keeps the unit water and weather resistant for years to come.

NEULITE FLUSH GLAZED

The insulating effect of your doors has a direct impact on how your rooms feel. Our glazing options provide not only a beautiful entry, but also a reliable barrier against the heat and damaging rays of the hot sun. Each double pane Low-E glass option provides Argon gas filled insulation to prevent the transfer of heat, keeping heat in during the winter and out during the summer. Available glass options are designed to reflect ultraviolet light, not only keeping interiors cooler or warmer, but also protecting interior furnishings from fading. Warm edge spacers help to keep the panes at the correct distance apart while reducing heat flow and preventing condensation.

HYDROSHIELD PROTECTION

Crafted with Hydroshield Technology, every Open & Beaded door contains the best combination of performance, durability, security and appearance.

Open & Beaded doors are precision engineered to provide protection against water infiltration. The specially engineered composite material will never absorb water, eliminating the problems commonly associated with wood and metal doors.

NEULITE SG10(79") & SG11(95")
29 ¾, 31 ¾, 33 ¾, 35 ¾ X 79, 83, 95

Sidelite options available. Refer to p. 47

SIMULATED DIVIDED LITES (SDL)

Simulated divided lites give you the classic look and feel of a true divided lite door. 100% composite SDL bars are fixed directly to the glass and can be ordered with or without grilles between the glass. 1-1/4" and 3-1/2" SDL bars are available for the 1" glaze option in smooth finishes to match the door's finish.

COMPOSITE

JAMBS & ACCESSORIES

Maintenance-free smooth white or woodgrain composite offers all the strength and convenience of wood with enhanced properties, providing a moisture and damage resistant product suited for the Canadian climate.

Though machined with the same process as traditional wood door frames, solid composite provides twice the holding power of wood. While similar door frames may crack or bow under the intense cycle of the Canadian climate, these composite door frames have proven to stand proud against the test of time.

Research shows that in most forced entry situations, door system failure lies within the frame, not the door slab. Our composite frame will not splinter or crack, providing a virtually indestructible product and reducing forced entry concerns.

These premium composite frames – an innovative alternative to traditional wood frame construction.

- Textured woodgrain or pre-pigmented smooth white frame components are a blend of PVC and wood fiber composite substrate.
- Solid composite provides twice the holding power of wood.
- Will not discolour, absorb moisture, splinter, or rot.
- Textured woodgrain composite components have a realistic rich appearance requiring paint or stain.
- Jamb can be painted or stained to your requirements.

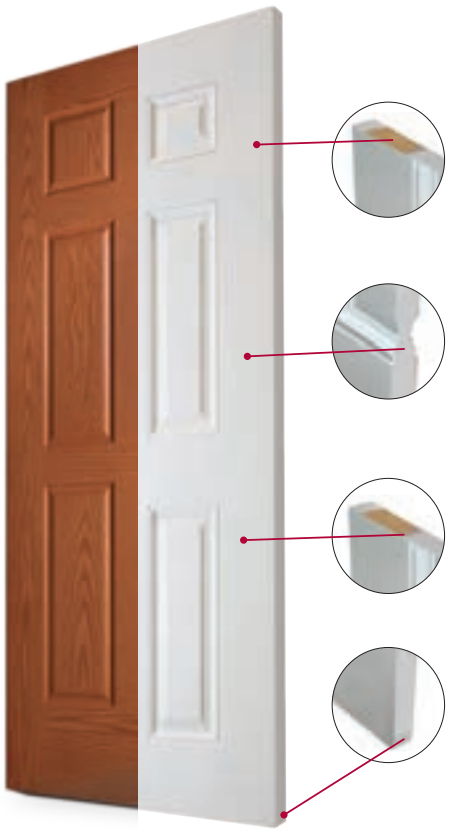
FIBERGLASS
DOOR SLABS

Specifically designed to withstand the harsh Canadian climate.

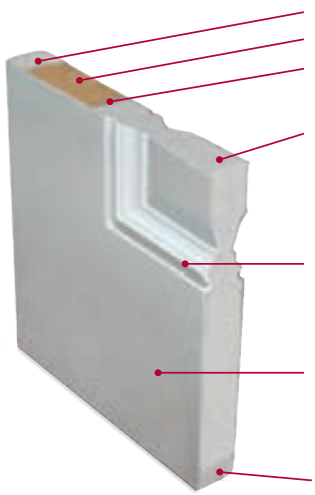


Exceptional Security
Our full length steel reinforced wood lock block offers exceptional security while allowing a range of hardware mounting options.

Energy Efficiency
Filled with an insulating core of 100% CFC-free polyurethane foam, providing an excellent R rating, while bonding the two door skins together.

Performance
Rigid structure prevents bowing and warping in extreme temperatures. The fiberglass skins are resistant to dents, dings, splintering, and corrosion.

Completely Waterproof
Our full length composite stiles and rails provide complete waterproofing for the door's insulation. These stiles will not splinter like wood or delaminate like steel.



Composite Stile
Full length wood block reinforcing
Steel Reinforcing

CFC Free Polyurethane Core
- Environmentally friendly – 100% CFC free
- Rigid core to provide dimensional stability
- 6x more energy efficient than wood doors

Deeper Embossing Panel

Pre-pigmented smooth white skin
accepts a wide array of paint colours

Composite Rail

25 YEAR Limited Manufacturer's Warranty

Smooth white pre-pigmented fiberglass doors have a warm white finish to match the composite frame. The doors will accept an array of paint colours to match the decor of your home.
