Neat+™ is the clear choice for keeping your windows cleaner, longer.

Cleaner.
Greener.

Neat+ is a durable, permanent coating comprised of titanium dioxide (TiO_2), applied using a patented sputter up process.

Neat+ The Next Generation

Since 2006, more than 50 million windows with Neat coated glass have been sold.

Improved performance due to upgrades of both the quality & purity of the materials used.

Neat+ is Anti-Static

Uncoated Glass
Less conductive, attracting more dust/dirt

Neat+ Anti-Static
Neat+ is more conductive, reducing up to 40% less dust/dirt on the window

Neat+ stays cleaner, longer. Saving you time, money, and resources.

Neat+ works with the sun

Neat+ naturally reacts to the sun's UV rays to break down greenhouse gases like methane and other pollutants.

Neat+ breaks down pollutants 25% better than original Neat.

With enough UV, Neat+ will cause water to sheet, instead of beading up like uncoated glass, resulting in fewer water spots.

	Uncoated	Neat+	Neat+ With UV
Anti-Static Less dust/dirt buildup	+	+	+
Cleans Easier Less dust/dirt to remove	+	+	+
Fewer Resources needed Less chemicals/water	+	+	+
Water can Sheet Dries Faster / Fewer Water Spots	+	+	+
Decomposes Pollutants Such as Greenhouse Gases	+	+	+

Neat+ is available with all LoE® products and will not alter the window performance or color.

Any standard glass cleaning products can be used with Neat+.
