Hybrid for Casement and Awning

Your comfort, our priority

PVC CORE COVERED WITH ALUMINUM ON THE EXTERIOR

Benefit from the performance of PVC

and appreciate the beauty of aluminum

EXCEPTIONAL INSULATION

*The PVC core of these windows ranks at the top of the industry in terms of energy efficiency. The **multi-chamber structure** limits heat exchange and, thanks to the largest number of internal chambers in the entire industry, increases the **insulating value** without adding filler – a less expensive and more recyclable technology.*

UNPARALLELED WATERPROOFNESS

*True barriers to drafts, these windows are **ultra-tight** and achieve the best performance in the industry. Fewer air changes also translate into **energy savings**.*

PERFORMANCE ALL THE WAY

These window models can accommodate invisible Low-E metal film as well as triple-glazed glass, the most efficient on the market.

PERFECT FINISH

Careful design and precise fit allowing for impeccable seals at window corners.

ENAMEL FINISH

Thermosetting acrylic recognized for its superior resistance to corrosion, impacts and surface scratches.

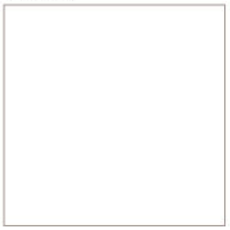
UNPARALLELED ROBUSTNESS OF THE FRAMES

*PVC products are welded; they benefit from greater **robustness** than mechanically assembled* products. Its multi-partition design maximizes weld strength. The result: products that pass all structural and burglary tests with flying colors.

EXTERIOR COLOR SELECTION*

Commercial Brown K7390

Khaki UC90590



White K1285

black K90421

coal uc108935

Other colors are available as an option, including clear anodized. Actual colors may vary slightly due to the printing process used.

comfort

in complete peace of mind

peace of mind

EXCEPTIONAL INSULATION

The PVC core of these windows places them at the top of the industry in terms of energy efficiency. Their exceptional insulating properties translate into savings, comfort, and peace of mind for years to come.

SUPERIOR SOUND INSULATION

Shh! Experience the silence provided by these windows. The multi-chamber design and numerous weatherstripping help eliminate outside noise.

UNPARALLELED WATERPROOFNESS

Effective barriers to drafts thanks to their multiple weatherstripping, these windows are ultra-tight and achieve the best performance in the industry.

PVC MORE RESISTANT TO COLOR VARIATIONS

Let the light in! Our unique PVC formula makes our window profiles ultra-resistant to UV rays. Tests have shown that they withstand them twice as well as competing products. Your windows will remain resistant to yellowing and discoloration.
