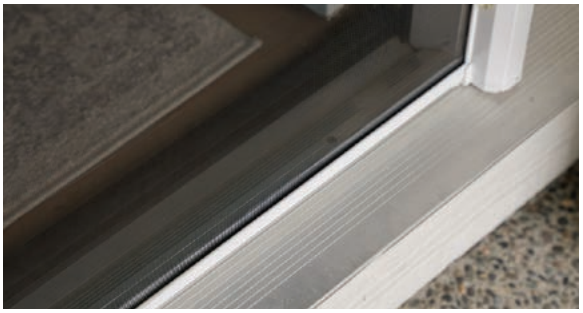
MESH LOCK CAPTURED EDGE

Want to keep small pets in and debris out? We've got options! Our retractable door screens come with our mesh lock option – a captured edge solution that secures the mesh in the top and bottom tracks, preventing mesh from blowing out from the track. Great for small pet owners!



STANDARD FLOATING EDGE

Our retractable door screens with floating edge provide bug protection while letting your home's design shine. The mesh floats along the top and bottom track, allowing for a little extra give. Designed for everyday ease, the floating edge mesh glides smoothly, perfect for frequent use and quick access to fresh air.

LATCHING HANDLE

An integrated quick-release latch in the handle makes it easy to use, quiet, and secure from unintended openings.

LATCHING HANDLE WITH LATCH STOP

When you choose the latching handle, you have the option to add a lock to the handle for added peace of mind.

MAGNET HANDLE

Our simple, original handle uses a magnet closure system that allows for easy release and breakaway upon impact to protect the mesh.
